ALL INTERNATIONAL DANCE TESTS

The International Solo & Team Test Dances should be skated International Style. CIPA & CEPA Dance Diagrams & Patterns may be found in the USARS Dance Book. (revised/reprinted Aug 2015).

Each skater will skate their own part (female skater skates the female steps of each dance and the male skater skates the male steps of each dance).

A skater has the option for solo dance tests to skate the part of the dance as specified for USARS Domestic and CIPA competition.

All International Solo and International Team Dance candidates, where only one member of the team is testing, shall skate two repetitions of full circuit dances and four repetitions of half circuit dances. When both candidates in a team dance are testing, they shall skate 3 repetitions of full circuit dances and six repetitions of half circuit dances.

The referee is responsible for counting the repetitions and allowing sufficient rest periods.

Delanco Tango (Solo)		104 Tango

GOLD MEDAL INTERNATIONAL DANCE TESTS

For International Gold tests #11 and #12, all candidates will skate individually warming up a dance then skating the dance. Two repetitions of a full circuit dance will be skated and four repetitions of a half circuit dance will be skated.

At least one minute rest should be given after skating a dance and warming up the next dance and a minute before judging.

For team tests, only one partner may be judged at a time by a panel of judges. Each test must be completed prior to starting the next test.

The Gold Medal Test Director and/or Referee may extend the rest periods if required for health reasons.

Please review the Gold Medal Test Section on page 66 for further Gold Medal Test procedures prior to scheduling a Gold Medal Test Center.
